

# Team6

The New FinTech Innovators

# Problem

## PROBLEM 1

Crypto currency investing decisions can be complicated and easily misunderstood.

## PROBLEM 2

Access to a simple, free, investing tool is hard to obtain.

## PROBLEM 3

A simple interface where the users concerns are paramount is hard to find.

### SOLUTION 1

We propose a free, simple application that will allow users to ask investing questions on one crypto currency at a time.

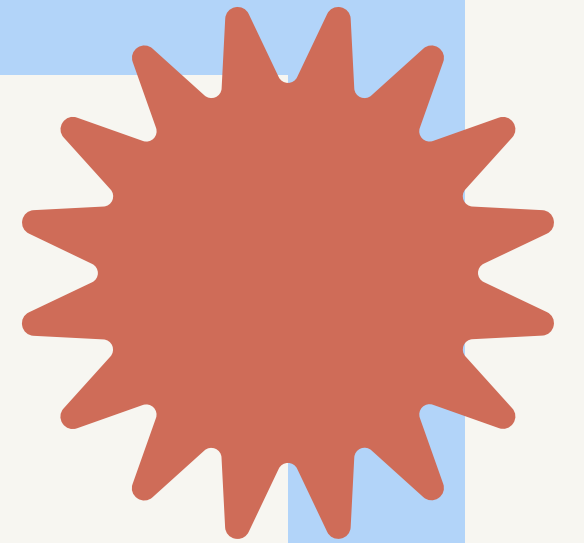

### SOLUTION 2

We provide an unbiased, independent analysis based on the user's needs.

### SOLUTION 3

There is no prior knowledge of the technology required.

# The Utopia

# Crypto Query Lite

Crypto Query Lite is the new application that will allow users to gain meaningful investment information on a range of crypto currencies.

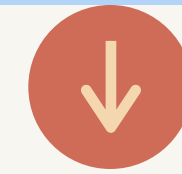

As a crypto trader you need a visualization of volatility of cryptocurrencies to determine the best & worse possible returns of that crypto investment.

### STEP 1

Select the crypto currency you want information on

### STEP 2

Enter how much money you want to invest in USD

### STEP 3

Your potential returns are auto generated

## CHALLENGE 1

Obtaining a reliable API.

## CHALLENGE 2

Creating a truly interactive user interface.

## CHALLENGE 3

Creating analysis from MonteCarlo simulations.

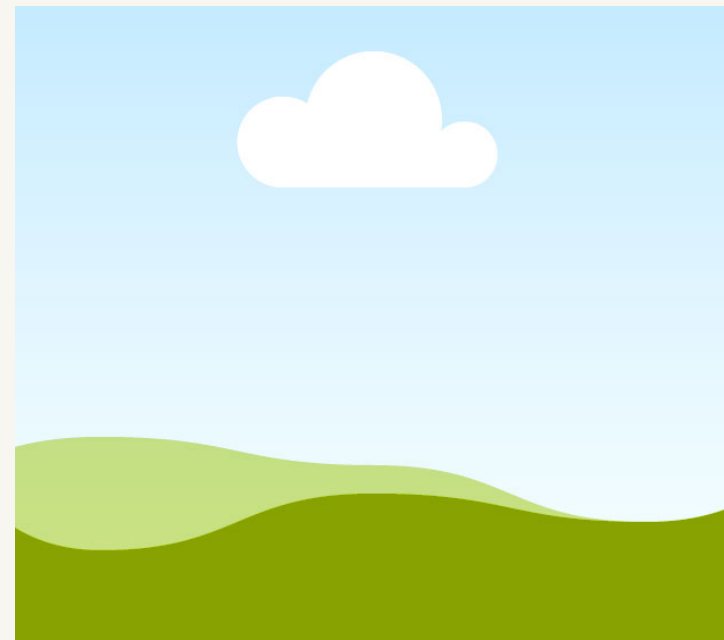

# Challenges

# Enjoy the demo!
